

# SHARON KADAMANDLA

*Junior Software Developer*

[sharon.kadamandla@gmail.com](mailto:sharon.kadamandla@gmail.com) | [LinkedIn](#) | [GitHub](#) | [sharondev.com](http://sharondev.com) | Toronto, ON, Canada

## PROFESSIONAL SUMMARY

Results-driven Junior Software Developer with 1.5+ years of enterprise software engineering experience and a strong academic foundation in Computer Science, Data Analytics, and AI. During my studies, I volunteered to develop websites and upskilled myself. Proficient in Java, Python, JavaScript, and TypeScript with hands-on expertise in Spring Boot, React, and Microservices architecture. Demonstrated ability to build scalable, production-grade backend systems, RESTful APIs, and AI-powered applications. Dean's Honours Roll graduate seeking to contribute robust full-stack development skills to a collaborative engineering team.

## TECHNICAL SKILLS

**Programming & Automation:** Python, Java, JavaScript, SQL, TypeScript

**AI & Emerging Technologies:** Generative AI, LLM Applications, Prompt Engineering, AI Workflow Design, OpenAI APIs

**Data & Analytics:** SQL, Excel, Power BI, Tableau, Data Validation, Root Cause Analysis, Technical Documentation

**Support & Operations:** Technical Troubleshooting, Incident Management, User Support

**Professional Skills:** Process Improvement, Communication, Problem Solving, Training Development, Cross-Functional Collaboration

## PROFESSIONAL EXPERIENCE

### Freelance Software Developer | Canada

06/2025 – Present

- Develop applications and automation workflows using CMS platforms and custom code.
- Design and implement intelligent workflows that reduce manual effort and improve user self-service experiences.
- Create technical documentation, user guides, and knowledge resources to improve issue resolution and system adoption.
- Analyze recurring issues, identify root causes, and implement long-term process improvements.
- Collaborate with stakeholders to automate repetitive business processes and improve operational efficiency.

### Customer Service Manager | Walmart, Canada

2024 – Present

- Act as the primary escalation point for customer issues, resolving complex cases while maintaining high service standards.
- Analyze recurring customer concerns and implement process improvements that reduce operational inefficiencies.
- Train and mentor team members, ensuring consistent service quality and adherence to operational procedures.
- Document workflows, support materials, and process updates to improve team effectiveness and knowledge sharing.
- Collaborate with multiple departments to resolve issues quickly and improve customer experience outcomes.

### Associate Engineer – Technology | Virtusa, India

05/2022 – 08/2023

- Supported enterprise applications by troubleshooting technical issues and resolving production incidents.
- Participated in Agile teams to improve workflows, system reliability, and operational processes.
- Developed backend services using Java, Spring Boot, SQL, and API integrations.
- Created technical documentation, issue logs, testing records, and implementation guides.

### Software Engineering Intern | Virtusa, India

01/2022 – 04/2022

- Assisted with software testing, debugging, issue resolution, and technical documentation.
- Worked with databases and application systems to validate functionality and resolve defects.
- Supported development teams in maintaining application quality and performance.

## PROJECTS

### AI Audio Translator (Python, OpenAI, Google Cloud) | GitHub

- Built an AI-powered telugu language translation platform leveraging speech recognition, LLM processing, and text-to-speech generation.
- Designed end-to-end AI workflows integrating multiple services through APIs and automated processing pipelines.

### **AI Resume Analysis System (Python, NLP, Machine Learning) | GitHub**

- Developed AI workflows for document analysis, feature extraction, sentiment analysis, and recommendation generation.
- Applied LLM-inspired language processing techniques to improve automated decision support.
- Created structured evaluation processes to improve consistency and accuracy of outputs.

### **EDUCATION**

**Post-Graduate Certificate, Data Analysis for Business Decision Making**      Durham College, Canada | 2025

**Post-Graduate Certificate, AI Analysis, Design & Implementation**      Durham College, Canada | 2024

**Bachelor of Technology, Computer Science Engineering**      CMR Engineering College, India | 2022

### **CERTIFICATIONS & ACHIEVEMENTS**

Oracle Certified Associate, Java SE 8

Dean's Honours Roll – AI Analysis, Design & Implementation

Dean's Honours Roll – Data Analysis for Business Decision Making

Winner – AI Project Expo

Promoted Customer Service Manager | Walmart
